

Maps

PROPERTY MANAGEMENT FROM PLANS, BIM MODELS AND MAPS

- ▶ Integration of building data from plans (dwg or BIM models).
- ▶ Continuous navigation from maps to building interiors.
- ▶ Universal search of equipment or site services from maps and plans.
- ▶ Automatic peering of GIS/plan equipment and CMMS equipment.
- ▶ Triggering of management actions from maps or plans: maintenance rounds, diagnostic rounds, etc.
- ▶ Geopositioning of equipment & site services on maps or plans.
- ▶ Graphical data analyses by theme (occupied premises, use of facilities...) for better maintenance decisions.
